Last updated Friday, October 9, 2020. Welcome to the NEW ENGLAND MATH LEAGUE School Registration Index for the 2020-2021 school year. The tables below list the schools currently registered for one or more of our math contests. Within the league listing, the names of the schools are grouped alphabetically first by the state, then by the name of the city, then by the name of the school. The name of the competitive consultant, as well as the list of contests to which the school is registered, appears after the name of the school. School names can have multiple lists, one for each competition consultant. If the school name does not appear on the list, it is not yet registered for any contests this year. Search tips: If you can't find your school, be sure to check out alternative school names, such as PS123 can also be called George Washington School, or Public School 123. Schools belonging to a district with multiple districts may be listed according to either county. If the state name, province, territory or country is not listed below, then NO schools have registered to compete in the region concerned. Javascript should be enabled to use the jump function in the lists below. This web page is best viewed with a Javascript-enabled browser. Select a state to view information about the registration of the school competition. Note: States not listed on the menu above do not have registered schools.
